

**CronaTrans**

*The International Logistics Company*

## About the Company

Our company has 15 years of experience in logistics and, understanding its key role in business development, we provide our clients with professional transport and logistics services.

As a member of the international organization TAPA (Transported Asset Protection Association), the company is at the final stage of certification under the TSR Level 1 standard. This allows us to minimize transportation risks, comply with international security standards, and increase the confidence of clients and partners.

A distinctive feature of our work is an individual approach to building logistics solutions, which ensures reliability, high quality of services, and optimization of delivery time and cost.

## Geography of Transportation

We connect Kyrgyzstan with key destinations in the CIS and Asia, carrying out international routes, developing special logistics solutions, and organizing efficient transit routes in the following directions:

- Russia
- Belarus
- Armenia
- Georgia
- Kazakhstan
- Uzbekistan
- Tajikistan
- Afghanistan
- Mongolia

## Range of Our Services

International and domestic road transportation

E-commerce and B2B delivery in Kyrgyzstan, Kazakhstan, and Uzbekistan

Transportation of valuable and high-value cargo

Transportation of hazardous and oversized cargo

Brokerage services

Temperature-controlled cargo delivery

# International and Domestic Transportation

Our company provides a full range of international and domestic road transportation services. We organize cargo delivery of various complexity and volume while meeting deadlines, security requirements, and applicable regulations. The geography of transportation covers both domestic and international destinations, enabling our clients to efficiently build logistics chains and optimize transportation costs.

## E-commerce and B2B Delivery

For more than 5 years we have been providing courier delivery of IQOS products for the PMIE-commerce channel (B2C delivery of devices and sticks throughout Kazakhstan), including payment collection, digital marking, and compliance with all accounting, traceability, and consumer interaction requirements.

Since 2025, we have been delivering Ülker products from warehouses to retail stores in Kyrgyzstan.

## Transportation of Valuable and High-Value Cargo

A range of services for the transportation of valuable and high-value cargo may include:

- Cargo insurance at minimum rates.
- Installation of shock sensors on cargo.
- Cargo securing using any fastening methods.
- Two-driver operation to accelerate delivery.
- Client access to vehicle movement monitoring via satellite tracking.
- Armed cargo escort.
- Provision of customs deposit for transit of high-value cargo up to USD 15 million.

# Transportation of Hazardous Cargo

Our company provides hazardous cargo transportation services in strict compliance with international and national safety requirements. We ensure proper classification, packaging, marking, and transportation of cargo belonging to various hazard classes. Transportation is carried out using specialized vehicles and qualified personnel, ensuring safety of the cargo, environment, and all participants in the transportation process.

## Transportation of Oversized Cargo

Road transportation of oversized cargo is carried out using specialized vehicles and includes fulltransport support:

- Route planning and development
- Obtaining permits
- Loading, unloading, and rigging operations
- Coordination with regulatory authorities
- Operational control en route
- Customs clearance and cargo insurance

## Temperature-Controlled Cargo Delivery

This type of transportation is performed using modern refrigerated vehicles that undergo regular technical maintenance, ensuring stable operation of refrigeration equipment. Cargo location is monitored throughout the route, allowing the client to always be informed of its status. Transportation is performed in strict compliance with sanitary requirements: drivers undergo timely medical examinations, and vehicles are disinfected before each trip.

## Brokerage Services

CronaTrans provides professional brokerage services in the field of customs clearance. Having the status of a customs carrier allows us to transport goods under customs control without additional escort and with simplified border procedures. This ensures reduced clearance times, minimized delay risks, and more efficient organization of international transportation for our clients.

## Cargo Delivery Security

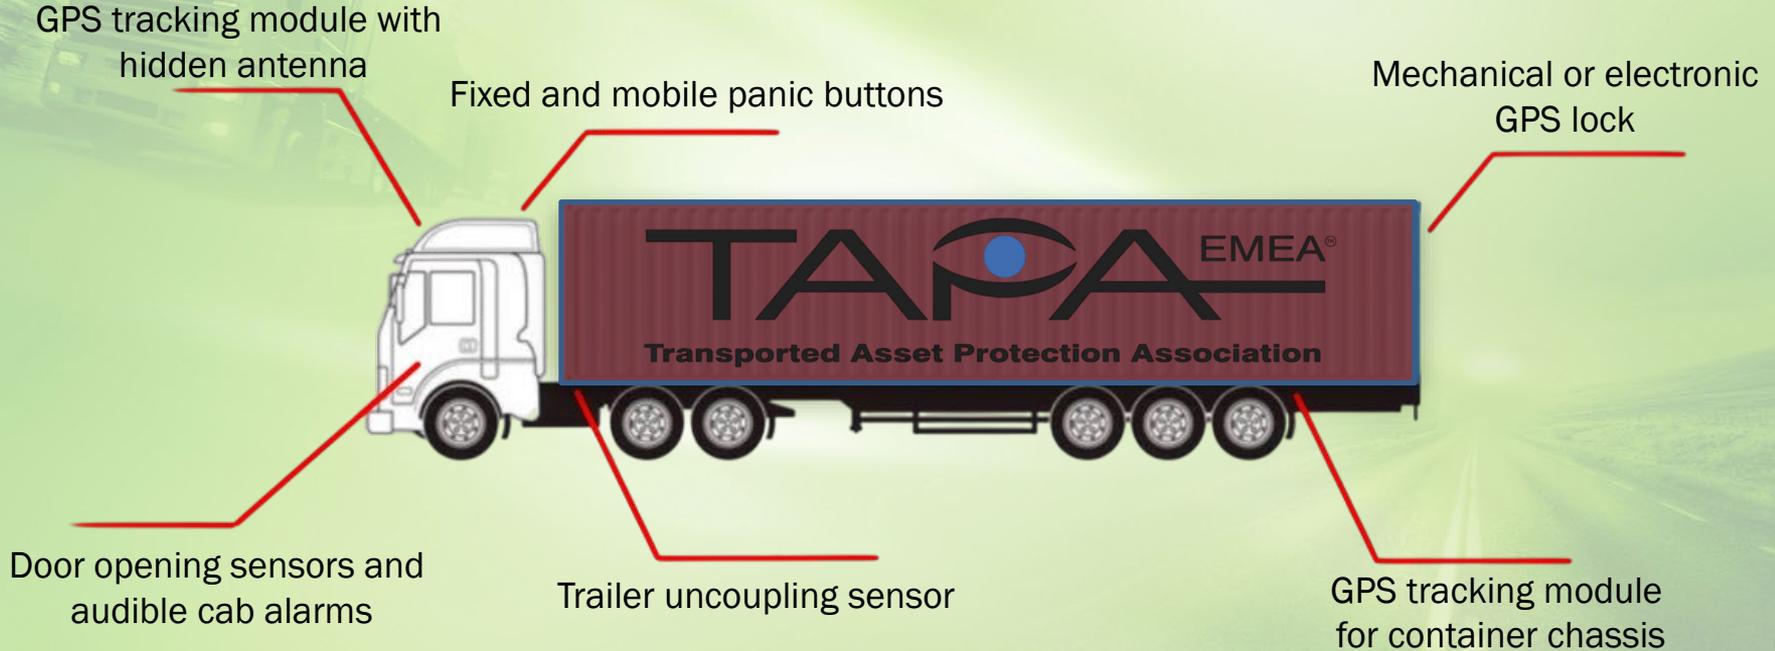

CronaTrans ensures a high level of cargo delivery security through professional guarding services and comprehensive technical equipment. At the client's request, we can organize armed or unarmed escort, escort vehicles, and transport with a security driver.

Security personnel are equipped with authorized weapons, special uniforms, radio communication equipment, and technical means that meet security requirements.

Our vehicles are equipped with modern security systems fully compliant with international standards, including:

- High-security trailer door locks.
- Lock protection boxes as an additional anti-tampering measure.
- Trailer door opening alarms.
- Panic button installed in the driver's cab with automatic alert to responsible personnel.
- Hands-free communication devices to ensure constant contact with the driver without creating traffic hazards.

# On-board Security Technology

## Advantages of Working with Us

Full range of  
logistics services  
(door-to-door)

Own vehicle fleet

Guarantee of safe  
transportation in  
accordance with TAPA  
requirements

Branch network with
